

EDUCATION

Feinberg School of Medicine Chicago, IL	Incoming 2026, Expected May 2030
MD via 7-year BA/MD program (Honors Program in Medical Education)	
Harvard Medical School Boston, MA	Dec 2024
MS in Biomedical Informatics GPA: 3.97	
• Activities: Harvard Innovation Labs, Cambridge After School Program, Harvard Boulderling Club, MIT Sailing	
Northwestern University Evanston, IL	Jun 2023
BA in Computational & Systems Biology, Data Science, and Linguistics GPA: 3.93 (Dean's List 8/9)	
• Activities: Resident Assistant, Camp Kesem, Books&Breakfast, Evanston Grows, Film Photography, The Garage	

WORK EXPERIENCE

Biotechnology Regulatory Fellow National Academies Washington, DC	Feb 2026 – Present
• Selected as one of 10 fellows for a national program training scientists in federal biotechnology regulation	
• Advise the U.S. Food and Drug Administration (FDA) on regulatory policy for emerging biotechnologies	
Co-Founder & CIO Bond Health New York, NY	Jan 2024 – Present
• Build an LLM-based platform to automate clinical trial patient recruitment, enhancing trial efficiency and diversity	
• Lead technical architecture, compliance strategy, and clinical deployment across clinical sites and FQHCs	
• Conduct stakeholder interviews and outreach across research coordinators, PIs, and pharma trial sponsors	
Data Scientist Behavior Remote	Sep 2023 – Dec 2023
• Implemented RNNs and random forests on 100+ parameter, 200k physiological datasets to predict cravings	
• Improved algorithm efficiency by 15% for accelerated real-time anomaly detection in patient wearable devices	
Strategy Consultant Mercurial-AI Chicago, IL	Mar 2023 – Aug 2023
• Developed and implemented strategic operational changes that successfully secured \$500k in pre-seed capital	
• Reviewed deep ensemble and causal frameworks to create holistic and personalized cancer treatment plans	

RESEARCH EXPERIENCE

ML Researcher Center for Precision Psychiatry, Mass General Hospital Boston, MA	Dec 2023 – Mar 2025
• Developed a metabolomics framework for early detection of depression using 280k patients and 250 metabolites	
• Built predictive regression pipelines to characterize polygenic risk and phenotype heterogeneity of depression	
• Applied residualization models to separate genetic vs. environmental contributions to metabolic biomarkers	
Molecular Biology Researcher Potocsnak Longevity Institute, Feinberg Chicago, IL	Mar 2021 – Jun 2023
• Probed the RNA-binding protein SERBP1 to combat PAI-1 induced fibrosis, aging, and Alzheimer's in vitro	
• Developed a novel, transgenerational epigenetic method of prion-mediated PAI-1 destabilization	
NLP Researcher Behavioral Research Lab, Yale University Remote	Mar 2022 – Jul 2022
• Conducted a comparative analysis of bargaining methods in verbal and non-verbal communication experiments	
• Analyzed over 6,000 minutes of negotiation data to quantify and discern key linguistic behaviors via Python	

PUBLICATIONS & MANUSCRIPTS

• Systemic Pain Documentation and Management Disparities in the Emergency Department (MIT)	
• Large Language Models in Informed Consent: Opportunities, Evidence, and Challenges (Brigham and Women's)	
• A Medico-Legal Approach to Subjective Pain Testimony in Disability Adjudication (Harvard Law School)	
• Metabolic Biomarkers of MDD Phenotype Heterogeneity (Massachusetts General Hospital)	
• Integrating Anticipatory and Physiological Factors to Predict Injection Pain Intensity (MIT Media Labs)	
• SERBP1: RNA-Binding Protein Regulation of PAI-1 in Aging and Fibrotic Disease (Feinberg School of Medicine)	

AWARDS

Raised \$1.2M+ in Funding for Bond Health	MIT 100K (2025) and Harvard PIC (2026) Semifinalists
Regeneron Science Talent Search Scholar	\$10,000 HPME (2021) and Weinberg (2022) Research Grants

SKILLS

Languages: Python, R, SQL, C++, Cypher, MATLAB, HTML, JavaScript
Technologies: PyTorch, TensorFlow, Git, Linux, Figma, DL, RL, NLP, API
Additional Skills: Spanish (Intermediate), Arabic (Intermediate)
